

Looking for Product-Market Fit and not *exactly* sure how to get there?

**LeapSheep provides radically better support for startups. Set better goals. Learn approaches that actually work. Get insider introductions. Get performance evaluations and recommendations so you can improve. Achieve success.**

Startups primarily fail due to risks that are well understood by world class startup experts. If you want to avoid these risks, startup support *quality* matters.

Startup epicenters like Silicon Valley outperform because they've developed specialist startup support expertise over decades, not because their founder ideas are better, or they have founders with innate startup talent.

It doesn't matter how much capital you raised, if you can't access world class startup support to guide you to use it efficiently, you're at risk of becoming a statistic.

At LeapSheep we're redefining startup support. We offer *world class startup support*, that's both **accessible**, and **affordable**.

Our startup builder support service is based on approaches from recognised startup thought leaders, we've built these approaches into a startup platform that we've tested with hundreds of startups. Get support from trained startup professionals that is completely personalised to your business.

**Contact LeapSheep today to learn how radically better startup support can help you achieve startup success.**

### Lateral Vision

Laura & Alex Tolson – Co-founders

Subscribed since Aug 2021

We were so relieved and excited to find a support service that enabled us to be true to our values and build the type of business we wanted to build, rather than scale a product which didn't solve a customer problem.

### Maximum Energy

Jed Durdin – Co-founder and Director
